

Dictation Contest (PRJr, 初級) No. 1025

Hi, everyone! Welcome back to PR Junior!
Today I will talk about traveling. Let's begin!

People travel for many different reasons, such as business and visiting family and friends. When people travel for leisure they are called tourists. Many people go on vacation because they want a break from their everyday lives, or to go to a warmer climate. Others enjoy learning about different cultures, tasting new food, and watching different lifestyles.

That's all for today! See you!

Dictation Contest (PR 1, 中級) No. 1025

Hello, everyone! This is PR1.
Today's topic is about the life of a performer named Charlie. Let's begin!

Charlie's mother was performing in a small theatre in Aldershot, south of London. Many in the audience were soldiers from the big army camp nearby. Rough and noisy, they liked to jeer and laugh at the performers' mistakes. The performers hated coming to Aldershot. As Charlie listened in the wings, the audience began to jeer and boo. Charlie froze. His mother's voice had never been strong, but now it had cracked and on trying to sing, ~~but~~ her efforts were gone into a whisper. She kept [going] in vain. As the noise from the audience increased, his mother was made to walk off the stage. When she came into the wings she was very upset.

That's all for today! Good job guys, and I'll see you in the next video! Bye!

Dictation Contest (PR2 上級) No. 1025

Hello, everyone, welcome back to PR2.

Today, let's explore a transformative moment in communication history: the invention of the telephone by Alexander Graham Bell.

In March 1876, Bell, a Scottish-born inventor, achieved a monumental breakthrough while working at his laboratory in Boston. Through his experiments with transmitting sound, he developed a device that could transmit speech electronically over long distances. On March 10th, Bell famously spoke the first words ever transmitted by telephone to his assistant, Thomas Watson, saying, "Mr. Watson, come here, I want to see you." This moment marked the birth of the telephone and the beginning of a new era in communication.

Bell's invention of the telephone revolutionized how people communicated, bridging gaps and connecting individuals across vast distances. Prior to [the] telephone, communication was limited to written letters and face-to-face interactions, often constrained by time and geography. The telephone changed all that, allowing instant voice communication regardless of location.

The impact of Bell's invention was profound, shaping the way society operated and fostering closer connections between people. The telephone became an essential tool for business, enabling rapid communication and the growth of industries such as telecommunications. It also transformed personal relationships, making it easier for families and friends to stay in touch over long distances.

His invention laid the foundation for [the] telecommunications industry and paved the way for future innovations in communication technology. Today, the telephone remains a ubiquitous device, continuing to play a central role in our daily lives.

That's all for today. See you next time!
